Forward-Looking Statements and Risk Factors

Materials and information provided in this financial disclosure may contain "forward-looking statements" based on current expectations, forecasts, estimates, business goals and assumptions that are subject to risks and uncertainties, which could cause actual outcomes and results to differ materially from these statements. Risks and uncertainties include general industry and market conditions, and general domestic and international economic conditions such as interest rate and currency exchange fluctuations.

Risks that may cause significant fluctuations in the consolidated results of the Eisai Group or have a material effect on investment decisions are described below. These are risk factors that have been identified and assessed as of the disclosure date of the Financial Report.

Risk factors associated with our business include, but are not limited to, challenges arising in overseas operations, uncertainties in new drug development, as well as risks related to strategic alliances with partner companies, medical cost-containment measures, generic drug products, intellectual property, possible occurrence of side effects, laws and

- * The Company discloses its consolidated financial statements according to the International Financial Reporting Standards (IFRS).
- * The Group's business is comprised of pharmaceutical business and other business. The pharmaceutical business is organized into the following five reporting segments in this report: Japan (Prescription Medicines, Generics, and OTC), Americas (North, Central and South America), China, Asia (primarily South Korea, Taiwan, Hong Kong, India, and ASEAN), and EMEA (Europe, the Middle East, Africa, and Oceania).

Following reorganization aimed at achieving sustained growth of the Japan business, the Consumer Healthcare Business—Japan reporting segment of the previous fiscal year has now been integrated into the Japan pharmaceutical business reporting segment.

From the fiscal year ending March 31, 2017, the method for calculating the segment profit of pharmaceutical business and other business has changed. Following the change, other income and expenses that had been allocated to pharmaceutical business and other business in the consolidated statement of income until the previous fiscal year is now reported under Group headquarters' management costs and other expenses. These changes have no major impact on the condensed consolidated financial statements.

The above changes have been reflected in the segment information for the previous fiscal year.

* All amounts are rounded to the nearest specified unit.

11. Major R&D Pipeline

In-House R&D Pipeline List

Product Name / Development Code	Additional Indication, etc.**	Development Stage***	Therapeutic Area****
New Approval			
Halaven (Liposarcoma)	AI	(EU) approved	Oncology
Fycompa (Oral suspension)	AF	(US) approved	Neurology
Lenvima (Renal cell carcinoma)	Al	(US) approved	Oncology
BELVIQ (Once-daily formulation)	AF	(US) approved	Neurology
Submitted / Preparing for Submission			

(1) Neurology

Development Code: **E2020** Generic Name: **donepezil** Product Name: **Aricept**

Description: Increases levels of the neurotransmitter acetylcholine in the brain by inhibiting the enzyme acetylcholinesterase from breaking down acetylcholine, thereby slowing the overall progression of symptoms associated with Alzheimers disease (AD). Currently approved in more than 90 countries around the world for the treatment of mild to moderate AD. Also approved as a treatment for patients with severe AD in numerous countries including the United States, Japan, Canada, and several other Asian and Latin American countries. Approved in Japan and the Philippines for dementia with Lewy bodies.

Severe Alzheimers disease (Additional Indication) Study 339

Development Code: APD356 Generic Name: Iorcaserin Product Name: BELVIQ

Indications / Drug class: Antiobesity agent / serotonin 2C receptor agonist

In-license (Arena Pharmaceuticals)

Description: Antiobesity agent with novel mechanism of action. By selectively activating serotonin 2C receptors in the brain, it is believed to decrease food consumption and promote satiety. Approved in the United States by the U.S. Food and Drug Administration in June 2012 as an adjunct to a reduced-calorie diet and increased physical activity for chronic weight management in adult patients

(2) Oncology

Development Code: E7389 Generic Name: eribulin Product Name: Halaven

Indications / Drug class: Anticancer agent / microtubule dynamics inhibitor

In-house

Description: A synthetic analog of halichondrin B derived from the marine sponge, Halichondria okadai. Shows an antitumor effect by arresting the cell cycle through inhibition of the growth of microtubules. Approved in over 60 countries including in the United States, in Europe, Japan and Asia for use in chemotherapy for breast cancer. Approved in countries including the United States, Japan and in Europe for use in the treatment of soft tissue sarcoma.

Breast cancer Study 304

(3) Gastrointestinal Disorders	
	Development progress from April 2016 onwards

Development Code: **E6007**

Inflammatory bowel disease (integrin activation inhibitor) JP: PI

In-house (development conducted by EA Pharma)

Oral

(4) Other

Development Code: **E6011**
